ADVANCED PTACS. HAPPY GUESTS.

PTAC | UP TO 14.0 EER | 3.9 COP

From day one, every **Amana**® brand product has been made with the same core philosophy: to provide customers with high-quality products that are reliable, meet their needs and last longer than the rest. And we keep that philosophy firmly in mind when we build our **Amana** brand Packaged Terminal Air Conditioners (PTACs). Whether you are in the hotel/hospitality industry or provide assisted living services, **Amana** brand PTACs are designed to provide your business with plain-and-simple product durability and advanced energy management features, while helping you to create the best indoor comfort possible.

Unrivaled product customization options including **Make-up Air, Smart vent and Economizer, Lighting Control, Seacoast, Hydronic and more.**

ADVANCEMENTS COMPARED TO "G" SERIES MODELS

Reduction of on-board controls for modern and streamlined appearance and operation

- New modern Quiet White™ color
- Integrated wired and wireless thermostat connectivity
- L 2-40 compliant materials and assembly

Integrated Bluetooth® & RF connectivity and the new Amana brand mobile app

- Reduces unit setting and unit configuration time
- Features advanced unit troubleshooting and diagnostics
- Integrated Eden™ Energy Management System Connectivity

Improved design and materials to reduce operating noise transmission

- Sound Transmission Class (STC 29) rating for all units
- Reduction of exterior and operating sounds from entering the guest room

Available with R32

- New California regulations require a Global Warming Potential (GWP) of 750 or less
- R32 has a GWP of 677
- R32 is up to 12% more efficient than R410A
- Our **Amana** brand PTAC now can achieve an EER value up to 14.0

SMARTER ENERGY MANAGEMENT

The **Eden** Concierge system is the first of its kind. A way to give hotels, nursing homes, schools and any buildings with PTACs a better way to manage them.

The magic happens thanks to an in-room wireless thermostat and occupancy sensor. The in-room PTAC and peripherals are connected with a button push, and there's no wiring to run.

Using **Eden** Concierge, every PTAC in the building can be viewed in real-time to check unit performance, temperatures, unit settings and run a maintenance check.

EXPERIENCE QUIET COMFORT

You can be assured that your **Amana** brand PTAC will provide your guests with quiet comfort and operation. To minimize the operating sounds, we've acoustically engineered our system with enhancements that include an indoor tangential fan for quiet and even air distribution and a two-speed indoor motor for enhanced guest comfort. Additionally, the two-speed outdoor fan allows for lower overall sound as compared to units without this feature.

Innovation and features are packed in as well. Skilled engineering ensures the unit achieves an STC 29 level, R-32 Refrigerant is available on all units and RF/Bluetooth® integration provides new levels of connectivity.

Designed and assembled in the USA for over 45 years

Indoor tangential fan for quiet operation and optimal air distribution

Reliable design with R-410A and R-32 refrigerant filter drier and high-pressure switch

Compatible with the Eden Wireless Energy Management System
